

Can you tell which pill?

DID YOU KNOW? A pill or line may have no fentanyl but another from the same batch may have a dangerous amount. When people make or sell drugs and mix in fentanyl, it doesn't always spread evenly throughout the batch. It's only safe to use drugs your doctor prescribed. If you use other drugs, know how to protect yourself [→ fentanylfacts.org/staysafer](https://fentanylfacts.org/staysafer)
