

Never know what you're gonna get

It's hard to know if fentanyl is in your drug. You can't taste it. You can't smell it. And it doesn't always look the same. Other drugs you use might contain fentanyl because it's cheap and strong. People who make drugs often mix it in to make the drug stronger at less cost to them.

Be aware. Take care [→ fentanylfacts.org/staysafer](https://fentanylfacts.org/staysafer)
